Unlock Your Warehouse Potential with Apex Companies

PRODUCTS

Pallet Rack & Storage Solutions - a full range of options to meet your unique application requirements.

Automated Storage & Retrieval Systems - semi- or fully-automated systems scaled for your large palletized loads down to single-case or tote-stored items.

Mezzanines - single and multi-level mezzanines designed and engineered to maximize space, function, and safety.

Conveyor Systems - an extensive complement of options configured to fit your unique inventory specs and needs. Fully integrated into your operation for optimized results.

Pick Modules - simple to complex, multi-level, fully integrated systems that optimize storage and processing for maximum throughput.

Inplant Offices & Modular Buildings - save time and money vs. stick-built construction with fully customized work and personnel spaces.

New & Used Pallet Rack Components - large variety of uprights, beams & accessories, ready for Quick Ship from our strategically located stocking warehouses.

SERVICES

Warehouse & Storage System Design - detailed analysis and customized planning for warehouses, distribution centers, and manufacturing plants.

Automation Solutions - data-driven, vendor-agnostic solutions from products to technology that address your precise needs and achieve your goals.

Project Management & Installation - safety-trained professionals provide full-service scheduling, permitting & expert design build-out.

Rack Inspection & Repairs - certified rack inspectors thoroughly evaluate systems and provide independent repair solutions and safety recommendations.

Fabrication & Refurbishing - configure and/or paint rack components to match your existing pallet racking or simply meet your needs.

Rental & Leasing Services - increase your storage rack capacity without adding debt, depreciation and obsolescence expenses, or maintenance costs.
