

Industrial Airflow Systems for Warehouses

Improve Comfort. Reduce Hot Spots.
Boost Productivity.

Your facility is a collection of spaces with different airflow needs. From confined work areas to wide-open warehouse environments, Apex designs industrial airflow solutions that deliver the right air movement where it's needed most.

The result is improved worker comfort, better circulation, and a more efficient operation—from warehouse aisles and loading docks to pick modules and mezzanines.

One Airflow Strategy. Multiple Solutions.

HVLS Ceiling Fans

Nationwide Service

Large Open Spaces

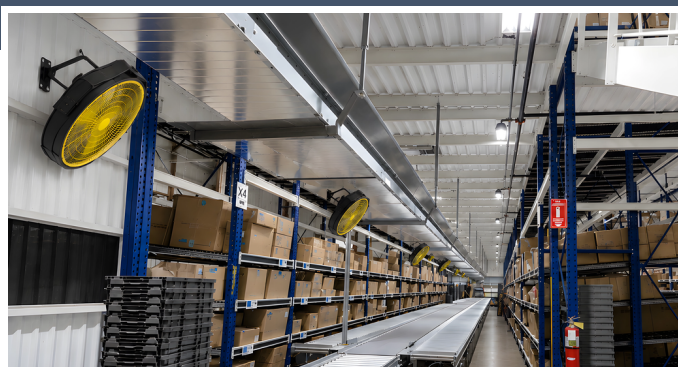

HVLS Ceiling Fans

Large industrial ceiling fans deliver high-volume, low-speed airflow across storage areas and distribution environments.

Benefits:

- ✓ Wide-area air circulation
- ✓ Reduced temperature stratification
- ✓ Quiet, energy-efficient operation
- ✓ Direct-drive PMSM technology (no gearbox, no oil, only two moving parts)

Targeted Work Zones

Directional & Mobile Fans

Focused airflow solutions help address hot spots and stagnant air in areas where large ceiling fans aren't practical.

Benefits:

- ✓ High-velocity airflow
- ✓ Wall-mounted and mobile fan options
- ✓ Improved airflow in confined areas
- ✓ Fast installation with minimal disruption

Centralized Management

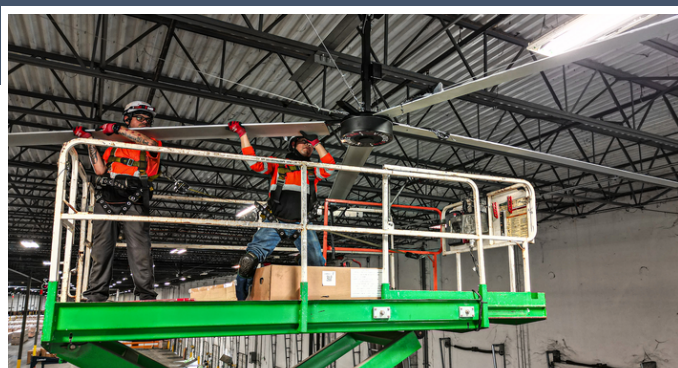

Intelligent Controls

Coordinate airflow across multiple fans and warehouse zones through centralized scheduling, automation, and control.

Benefits:

- ✓ Multi-fan control
- ✓ Zoning by operational area
- ✓ Scheduling & automation
- ✓ Temperature-responsive operation

Hassle-Free Installation

Expert Nationwide Service

Rely on our expertly trained installation teams for seamless airflow system installation with minimal disruption to your day-to-day operations.

Benefits:

- ✓ Product-trained installation teams
- ✓ Coordinated project execution
- ✓ Nationwide installation coverage
- ✓ Minimal operational disruption

Let's Solve Your Warehouse Airflow Challenges.
